SEED EXPORTS TOTAL \$196.3 MILLION

U.S. exports of seeds for planting totaled \$196.3 million for July, 1981 - February 1982, 6 percent below a year earlier. February exports of \$42.0 million were 19 percent above February 1981, continuing the improvement noted when January exports of \$42.8 million indicated an increase in monthly exports over last year for the first time in this marketing year. After a slow start, this pattern of heavy shipments later in the marketing year reflects the strength of the dollar and high interest rates in importing countries.

Forage seed exports continued at a slow pace for this period, totaling \$44.0 million, 26 percent below last year. Alfalfa, fescue and ryegrass exports of \$14.0 million, \$4.3 million and \$4.7 million were down 38 percent, 38 percent and 23 percent, respectively, in comparision with the first eight months of the last marketing year. Vegetable seed exports of \$68.7 million through February were 4 percent under last year, but made up over a third of total exports. Sweet corn seed exports of \$8.8 million, and tomato seed exports of \$2.7 million, were each up 33 percent this year. Radish seed exports more than tripled at \$1.6 million. Bean, cantalope, onion and vegetable seeds, not specified, all experienced significant reductions in sales for 8 month period. Corn seed moved well, totaling \$44.9 million, a 32 percent increase through February and \$13.5 million, a 168 percent increase for the month of February.

Shipments to the European Community have improved, totaling \$60.2 million through February, 5 percent below a year earlier. Corn seed, \$20.8 million, doubled since last year and made up 46 percent of total U.S. corn export value. Flower seeds, \$1.9 million, sorghum seeds, \$1.8 million, and soybean seeds, \$1.0 million, have also moved well recently while exports of vegetable seeds and forage seeds were down 12 percent and 46 percent in value, respectively, for the 8 month period.

Mexico continued as the No. 1 market for U.S. seed exports. Shipments to Mexico totaled \$33.3 million through February, a 24 percent increase over last year and 17 percent of total U.S. exports. Soybean, grain sorghum, corn, alfalfa, and vegetable seeds were up significantly while forage seed exports as a group dropped 23 percent to a total of \$7.0 million through February. Japan continues as the No. 2 market at \$23.1 million, even though shipments are 2 percent below a year ago. Italy has moved into position as the number 3 market with shipments valued at \$7.6 million during February, bringing cumulative totals for the year to \$22.1 million, 6 percent above last year. Exports to Canada lagged 11 percent through February, totaling \$17.4 million. Shipments to France, Greece, Australia, and Saudi Arabia, all major customers, are above last year.

TRADE ALERT

BRAZIL: Brazilian officials have accepted U.S. provisions for growing-season-certification of corn seed as being free of downy mildew (Peronosclerospora sorghi). Certification of sorghum seed was previoulsy accepted regarding downy mildew. A FREE OVERSEAS TRADE SERVICE

A monthly newsletter called <u>Contacts for U.S. Farm Products</u> can help introduce your products to foreign buyers. A description of your product(s), address, bank reference, phone and telex or cable address is sent to USDA's representatives overseas for distribution to importers in their country of assignment. Interested buyers will then contact you. For this service, contact the marketing representative with your state department of Agriculture, or the equivalent, located in your State capitol. Alternatively, write to the Export Promotion Division, Foreign Agriculture Service, Room 4945-South, U.S. Department of Agriculture, Washington, D. C. 20250 and the participation form will be sent to you.
